11.1 PURPOSE & FINDINGS

11.1.1 This sign ordinance is adopted under the zoning authority of the County of Lee in furtherance of the more general purposes set forth in this Ordinance. The purpose of these sign regulations are:

- (a) to encourage the effective use of signs as a means of communication in the County of Lee while preserving the rights of free speech under the First Amendment to the United States Constitution;
- (b) to maintain and enhance the aesthetic environment and the County of Lee’s ability to attract sources of economic development and growth; to improve pedestrian and traffic safety;
- (c) to minimize the possible adverse effect of signs on nearby public and private property; and
- (d) to enable the fair and consistent enforcement of these sign restrictions.

11.2 APPLICABILITY.

A sign may be constructed, erected, placed, established, painted, created, or maintained in the County of Lee only in conformance with the standards, procedures, exemptions, and other requirements of this Ordinance. The effect of this Ordinance as more specifically set forth herein is:

- 11.2.1 To establish a permit system to allow a variety of types of signs in commercial and industrial zones, and a limited variety of signs in other zones, subject to the standards and the permit procedures of this Ordinance;
- 11.2.2 To allow certain signs that are small, unobtrusive, and incidental to the principal use of the respective lots on which they are located, subject to the substantive requirements of this Ordinance, but without a requirement for permits;

11.2.3 To prohibit all signs not expressly permitted by this Ordinance; and

11.2.4 To provide for the enforcement of the provisions of this Ordinance.

11.2.5 The physical alteration of a sign face or supporting structure shall be considered the same as construction of a new sign which shall require a permit and conformity to all the dimensional requirements of this Ordinance. However, repainting of sign or replacement of sign face (i.e. with business ownership change) shall be considered maintenance or repair and shall not require a permit.

11.2.6 Notwithstanding any provision in this section to the contrary, non-commercial copy may be placed on any on-premise sign, or on any permitted off-premise sign, instead of commercial copy.

11.2.7 Existing signs that are required to be moved as a result of a public infrastructure improvement project (i.e., a road widening project, etc.) may be relocated and shall not be required to meet the requirements of this article, provided there is not any expansion, addition or structural change or new sign plan and/or design for that sign. If a pylon sign is to be relocated, the sign shall be relocated to meet the appropriate setback as set forth in this Article 11.

11.3 SIGN PERMIT.

11.3.1 APPLICABILITY.

No Sign shall be erected or established unless and until a Sign Permit has been issued by the Department of Community Development.

11.3.2 INITIATION.

The Applicant shall file a complete application for a Sign Permit with the Department of Community Development. The application shall include the information required for issuance of a building permit as prescribed by the Building Code. A master Sign Permit application may be requested for all signs to be included as part of a Planned Unit Development, a shopping center, a Commercial

Retrofit, or a Traditional Neighborhood Development.

11.3.3 SIGNAGE PLAN REQUIRED.

For any lot on which the owner proposes to erect one or more signs requiring a permit the owner shall submit to the Department of Community Development a Signage Plan containing the information required herein. For sites that contain multiple businesses, a signage plan that shows all proposed signage shall be required. Note that shopping centers and/or superstores in excess of 25,000 square feet shall meet the additional criteria as set forth in § 10.2.8 of this Ordinance. The Department of Community Development shall review the application in accordance with the criteria established in this Ordinance. Permanent signs for planned unit developments, Traditional Neighborhood Developments and Special Uses shall be reviewed as part of the site plan. The Signage Plan shall include the following information:

- The location of buildings, parking lots, driveways, and landscaped areas on such lot or parcel;
- Computation of the maximum total sign area, the maximum area for individual signs, the height of signs and the number of freestanding signs allowed on the lot(s) or parcel(s) included in the plan under this Ordinance; and

An accurate indication on the plot plan of the proposed location of each present and future sign of any type, whether requiring a permit or not. Incidental signs need not be shown.

11.4 SIGN AREA COMPUTATIONS.

The following principles shall control the computation of sign area and sign height:

11.4.1 COMPUTATION OF AREA OF SINGLE-FACED SIGNS.

The area of a sign face shall be computed by means of the smallest square or rectangle, that will encompass the extreme limits of the

writing, representation, emblem, or other display, together with any material or color forming an integral part of the background of the display or used to differentiate the sign from the backdrop or structure against which it is placed, but not including any supporting framework, bracing, or decorative fence or wall when such fence or wall otherwise meets zoning ordinance regulations and is clearly incidental to the display itself.

11.4.2 COMPUTATION OF AREA OF MULTI-FACED SIGNS.

The sign area for a sign with more than one face shall be computed by adding together the area of all sign faces visible from any one point. When two identical sign faces are placed back to back, so that both faces cannot be viewed from any point at the same time, and when such sign faces are part of the same sign structure and not more than 42 inches apart, the sign area shall be computed by the measurement of one of the faces.

11.4.3 HEIGHT.

The height of a sign shall be computed as the distance from the base of the sign at normal grade to the top of the highest attached component of the sign. Normal grade shall be construed to be either of (1) existing grade prior to construction or (2) newly established grade after construction, exclusive of any filling, berming, mounding, or excavating solely for the purpose of locating the sign. In cases in which the normal grade cannot reasonably be determined, sign height shall be computed on the assumption that the elevation of the normal grade at the base of the sign is equal to the elevation of the nearest point of the crown of a public street or the grade of the land at the principal entrance to the Principal Structure on the lot or parcel, whichever is lower.

11.5 CONSTRUCTION AND MAINTENANCE.

All signs shall be designed, constructed and maintained in accordance with the following standards:

11.5.1 CONSTRUCTION.

11.5.1.1 All signs shall be designed, constructed, and maintained to retain sound structural condition, and shall comply with all applicable provision of the State Building Code, all applicable electrical codes, and this Ordinance, at all times.

11.5.1.2 Except for banners, flags, temporary signs, and window signs conforming in all respects with the requirements of this Ordinance, all signs shall be constructed of permanent materials and shall be permanently attached to the ground, a building, or another structure by direct attachment to a rigid wall, frame, or structure.

11.5.2 MAINTENANCE.

11.5.2.1 All sign supports, braces, poles, wires and anchors shall be kept in good repair. They shall be maintained in a safe condition, free from deterioration and missing parts.

11.5.2.2 Any sign not in compliance with these standards shall be deemed a nuisance, and shall be subject to a violation of this Ordinance as set forth in [Section 1.6](#).
